DETAILED ACTION

1. The Amendment received 7/30/03 has been entered. Claims 1-6, 8-11 and 13-25 remain pending in this application. The amendments to the specification, the claims and Applicants' Remarks/Arguments have overcome the objections and rejections recited in the prior Office action.

Information Disclosure Statement

2. The examiner has considered the references provided with the information disclosure statement (IDS) received 7/30/03 (see the attached form PTO-1449).

Allowable Subject Matter

3. Claims 1-6, 8-11 and 13-25 are allowed; and are renumbered as 1-22.
4. The following is an examiner's statement of reasons for allowance:

The present invention is directed to an electrophotographic display device for displaying an image to a user. Each independent claims 2, 6, 8, 13, 14 and 16 identifies the uniquely distinct features: "a loop of material (202) disposed proximate the electrophotographic assembly (200) and ...within the display area"; and "a control area (106) on the housing ... to accommodate one-handed use of the device", and/ or "the control area being disposed on the sidewall", or "wherein the device is portable" (see figs. 1 and 2). The closest prior art, the Eberhard et al (U.S. Patent No. 6,331,867) teach a hand-held display device, and Matsuzoe et al (U.S. Patent No. 5,953,564) teaches an image display device using a transfer belt loop, either singularly or in combination, fails to anticipate or render the above underlined limitations, which are in combination with other claimed limitations, obvious.
